

These comments are submitted in support of the Cache Creek Conservancy's Restoration Grant Application.

As a landowner of an industrial operation along the creek, we have had many problems with OHV trespassing and illegal riding in the area and would greatly appreciate any efforts to mitigate their destructive consequences. The Cache Creek Conservancy (CCC) was created with the express purpose of revitalizing the riparian habitat along Cache Creek, something the OHV riders do not seem to respect. The CCC is familiar with all types of restoration and has completed many projects in the area. As a neighboring landowner, we can attest to their complete and honest communication throughout any project and appreciate the Conservancy's professionalism. The CCC certainly has the expertise to implement any restoration projects in the area, and will be able to leverage any dollars committed to them by providing matching funds and resources. We fully support the CCC and consider them to be a worthy recipient of CA Department of Parks grant.
